OUTLOOK IN WESTERN SECTION OF TONOPAH

"This is one of my most pleasant visits to Tonopah," said the veteran mine manager and broker, Herman Zadiq, at the Mizpah, where he stopped last night after visiting the Tonopah and Goldfield properties in which he is interested.

"One of the most significant and helpful features at present is the striking of hot water in the Tonopah Bonanza shaft at a depth of 1645 feet. It is almost an assurance that when sinking is resumed a body of ore will be opened up. On the old Comstock the striking of a large flow of hot water was almost invariably a forerunner of a strike of a large body of ore. I have always maintained and still maintain that Tonopah will gradually develop into another Comstock and that the western portion of the district will eventually contain the biggest mines in this territory.

"I understand that the Great Western and West Tonopah are now pumping and in thirty days there should be interesting developments. Everybody that is familiar with Tonopah must realize that any development in either the West Tonopah or the Great Western will prove of the utmost importance to the Tonopah Bonanza ground. We are going to cut station at the 1615 point in the shaft. We have also ordered several large pumps to be installed in case we strike a great flow of water.

"I went through the North Star yesterday and must say I am more than pleased with the 1050 level. The next 30 or 60 days will likely give us something good there. A large block of hitherto unexplored ground will be crosscut. The 900 and 950 are also looking good and we expect to more

than make our expenses during the month of August. I also went down into the Rescue. All I can say is that development is going on there and that inside of 30 days we will be ready to start on the 1100 level and will make greater headway at the various points where we are now working. We now have the ore below the 950 and expect to shortly start drifting. The net profits for July were \$6700, which I consider a good showing, inasmuch as there was no stopping and considerable dead work was done.

"I am glad to see that they have made such a fine development in the White Caps. This should certainly stimulate activities in Manhattan and bring new capital into the camp. I was over in Goldfield yesterday and from all I could see we have excellent opportunities to open a body of ore at 900 feet. When the ore was struck the water came in so fast that there was little opportunity to study the find. The rock that came out caused considerable buying on the part of the miners and their friends. It looks to me as though Silver Pick may be the means of making a new Goldfield and that all properties west of the Columbia mountain fault may start operations.

"There are, in my opinion, good times ahead for Goldfield, Tonopah and Manhattan, and I expect to see great activity in all three towns before the end of the year. Harry Moore, for many years employed by the Goldfield Consolidated Mining company, and for many years a close personal friend of mine, accompanied me on this trip and will remain here for some time."

NEVADA CON. RECORD FOR LAST QUARTER

During the quarter 1,094,879 dry tons of Nevada Consolidated ore averaging 1.57 per cent copper were milled, as compared with 827,880 dry tons averaging 1.66 per cent copper for the previous quarter, says the Ely Record. Of the tonnage milled, 85 per cent was supplied from the pits and 12 per cent from the underground workings of the Ruth mine. In addition to the above, 5084 dry tons of Giroux Consolidated Mines company ore were milled during the quarter.

The cost of copper produced, including Steptoe plant depreciation and all charges except ore extinguishment, and after crediting all miscellaneous earning was 8.51 cents per pound, as compared with 9.65 cents for the previous quarter. Excluding the item of depreciation the cost was 7.78 cents, as compared with 8.94 cents for the previous quarter. The outcome is figured on copper price of 27.23 cents per pound for the quarter and 25.57 cents for the first six months of this year. No copper available for delivery remains unsold.

There was a surplus for the quarter of \$3,354,352.54 after payment on June 30 of the 26th dividend of 37 1/2 cents per share and extra dividend No. 5 of 37 1/2 cents. There was set aside \$185,079.98 for plant and equipment depreciation and \$109,355.50 for ore extinguishment, leaving a net credit to earned surplus for the quarter of \$3,059,917.06 and a balance of \$9,465,697.54 in earned surplus.

MARTIN DEAN OPENS HIGH GRADE SILVER

Martin Dean, the veteran prospector who located eleven of the most productive claims of Cripple Creek, is in a fair way of repelling his experience right here in Nevada, where he has found some of the prettiest ore seen since the first pick was struck in the Mizpah ground. Dean's new locations are at Deante, on Rawhide Mountain, twelve miles north of Clifford and 55 miles from Tonopah, where he has been working for the past ten years on a group of eleven claims.

Mr. Dean carries a sack of samples showing values as high as \$2000 in silver taken from a ledge four feet wide between walls in a lime and quartzite contact within thirty feet of a porphyry contact. Mr. Dean is hopeful of interesting capital in the find, which he declares will make one of the best producers in the state.

LEAVES FOR NEW HOME IN BEAUTIFUL DAYTON

Mrs. W. W. Anderson and daughter, Dorothy, left this morning for Dayton, Nevada, where she joins her husband.

Mr. Anderson has been appointed principal of the Dayton High school, having resigned his position in this city, where he successfully taught the science department for several years.

Mrs. Anderson and daughter have been remaining in camp until Mr. Anderson would be able to secure a desirable home in Dayton. During this interim the numerous friends of Mrs. Anderson have been busy making life pleasant for her with various little treats, dinners, gifts and enjoyable afternoons and evenings. Having resided here for three years and a half, Mrs. Anderson has endeavored herself to many with her pleasing personality, and her departure is attended with many expressions of regret, accompanied with wishes for success in the newly elected field at Dayton.

INSIST ON CALLING A STRIKE

(Continued from Page 1)

failed so far to develop any concrete plan likely to win approval.

As the conference continued there was less talk of action which would lead to a strike, but some of the executives are expected to fight to the last ditch any plan which would force an eight hour day upon the roads without some form of arbitration.

Among the more than 600 representatives of railroad brotherhoods in Washington there was evident today a feeling of restlessness and there were many inquiries of leaders as to how long they must remain. It is not expected that this feeling will lead to any open revolt unless the conferences between President Wilson and the executives are prolonged. Some of the leaders told inquirers today that they would not have to stay in Washington more than 48 hours.

It is understood that the chief object of the visit to the White House was to ask the president to state specifically how he expected the railroads to make up the millions of dollars which the managements say it will cost them to put into effect the eight hour basic day they are asked to grant.

The brotherhood heads in their first formal statement since arriving in Washington said in part:

"The sincerity of this new born and loudly proclaimed belief, as expressed by the spokesman of the railway president—'we stand for the principle of arbitration for the settlement of industrial disputes'—is best shown by the attitude of these railway companies, who are so loudly proclaiming the virtues of arbitration and their undying adherence thereto; by the attitude of those same companies toward arbitration on a long list of properties which they also wholly own and control, but which they have refused to include in the present negotiations and to the men on which lines they are refusing their 'day in court' so feelingly referred to by the spokesman of the railway president."

Here followed a list of 64 properties, which the statement said the brotherhood officials sought futile on June 27 to have represented by the

railroad managers in the present dispute.

"In addition to these," the statement continued, "are a large number of quasi independent properties largely dominated by the same financial powers, which we have vainly demanded should be included."

"These properties employ comparatively small numbers of men and on account of that fact the railroad managements feel that demands on those properties do not constitute a menace as they do on the larger properties. Therefore, the right to their 'day in court' is continuously refused. Thus the actual position of the conference committee and of the presidents above them is that on lines where the men are not strong enough to force a hearing, there is 'nothing to arbitrate,' while on lines where a costly contest could be precipitated, arbitration becomes the dearest principle connected with the settlement of industrial strife."

"It might be pertinent at this time to refer to the fact that the conference committee of managers and their supporters have excluded the army of colored brakemen and firemen employed on the southern railways from all benefits that might be granted in these negotiations or from all arbitrations that might arise. Are they, or are they not, entitled to their 'day in court'?"

"Likewise, the white firemen employed on those lines where the negro predominates. Why is he excluded from the benefits of this plan of arbitration?"

"Also, the hostlers on 18 of the leading properties that are represented by the conference committee: if arbitration is so desirable, why will not those companies grant those men a hearing?"

"The extreme solicitude on the part of the railway presidents for the 80 per cent of unorganized employees and their rights becomes farcical when it is known that on a large number of those lines it is a dischargeable offense on any of their railroads for that 80 per cent to take steps toward organizing for the purpose of bettering their wage or working conditions."

PERSONAL

MRS. ABBIE ZUICK and child left today for Sacramento.

W. TAGGERT departed on this morning's train for Dayton, Ohio.

MR. and MRS. HARRY MURPHY left this morning for Los Angeles.

J. H. KIRCHNER and wife were arrivals yesterday from Reno.

MRS. HAMILTON A. REED arrived today on No. 24 from Oakland.

C. F. McCONAS was an arrival on this morning's train from Denison, Cal.

F. H. GROVE and Howard Nelson motored in from Round Mountain last night.

HERMAN ZADIG, the mine operator, passed through Tonopah this morning from Goldfield on his way to the coast.

C. H. CANDLAND was a passenger on No. 23 today for Reno, where he will continue his studies at the university this fall.

MR. and MRS. J. W. BUCKLIN and family passed through here yesterday afternoon from Grand Junction to Los Angeles.

MR. and MRS. CHARLES CARROLL passed through Tonopah yesterday afternoon in their auto from Grand Junction, Colo., to their home at Long Beach.

E. J. RUPEY, engineer at the Montana left this morning for Sacramento, where he will join his wife and continue to the coast.

CLYDE HELLER, president of the Belmont and Jim Butler mines, accompanied by G. Gerry, geologist for the Belmont, were passengers this morning for Philadelphia.

MR. and MRS. CHARLES OWENS, accompanied by A. W. Richardson and wife, stopped in Tonopah this morning for several hours from Bedford, Ind., before leaving for Los Angeles.

AMUSEMENTS

BUTLER THEATER

The regular picture, "The Feast of Life," with Clara Kimball Young, which was to have been shown at the Butler this evening, missed train connections, and another picture will be substituted in its place. It is an Equitable production entitled "The Dragon," featuring Margarita Fischer, who plays a dual role of childish innocence and adult infidelity. This production, unusual in conception, the scenario of which was adapted by Russell E. Smith from the book by Percy Poore Sheehan, is vastly different from the general run of pictures. It is a powerful, dramatic tale as unusual as it is entertaining. Included also in tonight's program are Napoleon and Sally, the educated chimp, which are always interesting. Tomorrow, James J. Corbett will be seen in his old stage triumph, "The Burglar and the Lady," assisted by Claire Whitney, a five reel production filled with action, and Pathe Weekly. The night show starts at 7 p. m.

TIME is money, an' the two years invested in maturin' VELVET makes VELVET rich.

Velvet Joe

VELVET is rich and not with a richness acquired by artificial means. The method used to bring out VELVET'S Nature-given mildness, aroma and "body" is the ageing method (all rights reserved by Mother Nature herself).

Every ounce of VELVET is given not less than two years proper ageing in great hogs-heads. It takes longer, of course, than any hurry-up method, but it's the way to take out any "bite" without injuring the rich smoking qualities of Kentucky's choicest Burley tobacco.

You'll discover pipe satisfaction in VELVET that you'll not find in any other smoking tobacco.

Apply the pipe test to VELVET—the test that has already made hundreds of thousands of regular VELVET smokers.
